- **Codex task finished**

windows-notify-codex: The update is ready to review. All checks passed.

- **Codex task finished**

windows-notify-codex: The update is ready to review. All checks passed.

Find the look. Then choose the details.

Every concept has a stable number. Start with the six overview pages, then open the individual sheets for a closer comparison.

01-06 Quiet dark

Familiar dark cards with different levels of structure and emphasis.

07-12 Clean light

Bright, restrained surfaces for light desktops and softer contrast.

13-18 Compact

Smaller footprints, with deliberate tradeoffs in message capacity.

19-24 Typography first

Let text order and type choices do most of the visual work.

25-30 Muted color

A little personality through low-saturation surfaces and accents.

31-36 Subtle structure

Minimal changes to edges, grouping, and status placement.

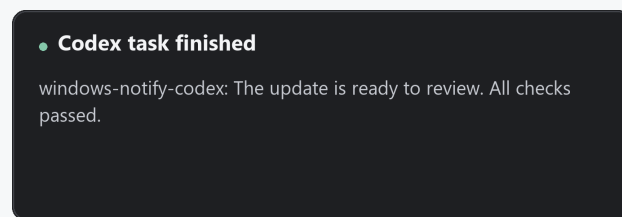

These are design mockups, not screenshots of implemented changes. The running notifier is unchanged. Color is paired with text or a symbol; completion and attention are never identified by color alone.

Cards use consistent sample content. On detail pages, every logical pixel is shown at 0.75 PDF points; actual on-screen size depends on your viewer zoom and display scaling.

Quiet dark

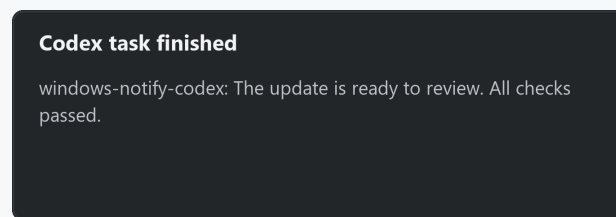

Familiar dark cards with different levels of structure and emphasis.

01 Refined baseline

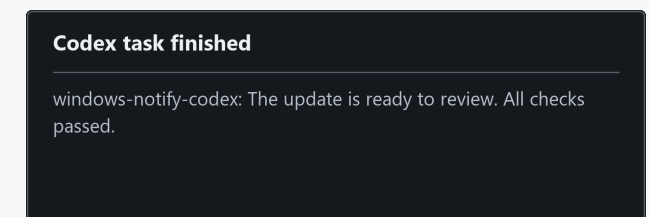

460 x 156 px / 10 px corners

02 Graphite quiet

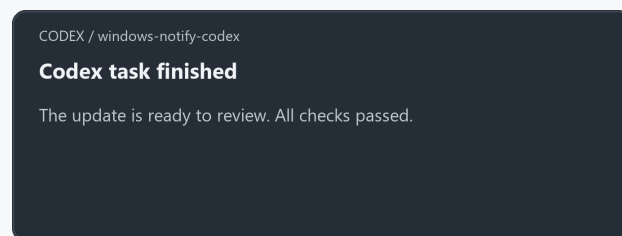

460 x 156 px / 8 px corners

WHY CHOOSE IT

The closest direction to the current app: familiar proportions and a small status dot.

TRADEOFF

The project stays in the body, so a long workspace name competes with the message.

● Codex task finished

windows-notify-codex: The update is ready to review. All checks passed.

ATTENTION

● Codex needs attention

windows-notify-codex: Choose an option to continue. Your input is needed.

LONG MESSAGE / OVERFLOW

● Codex task finished

windows-notify-codex: The notification update is ready to review. Spacing, typography, and status colors are consistent. Files & folders keep their names. A longer message should remain readable and end cleanly when there is more text than the card ca...

WHY CHOOSE IT

A softly tinted header separates status from the message without a hard divider.

TRADEOFF

Two surface tones give it a more structured appearance.

 Surface
#F9FAFB

 Text
#2B3941

 Accent
#547966

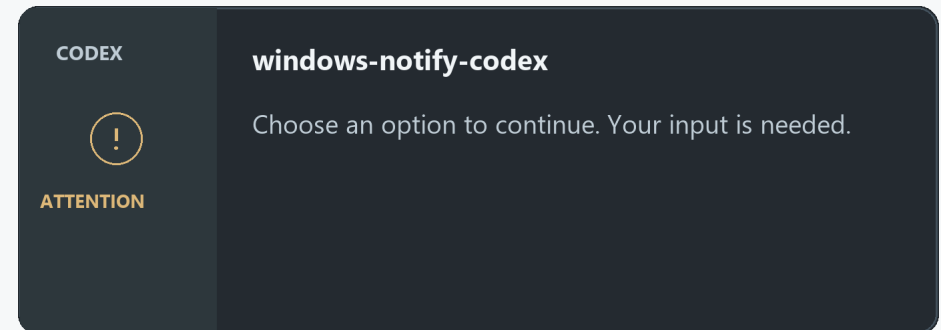

33 Split surface

460 x 164 logical px / 10 px corner radius / split layout

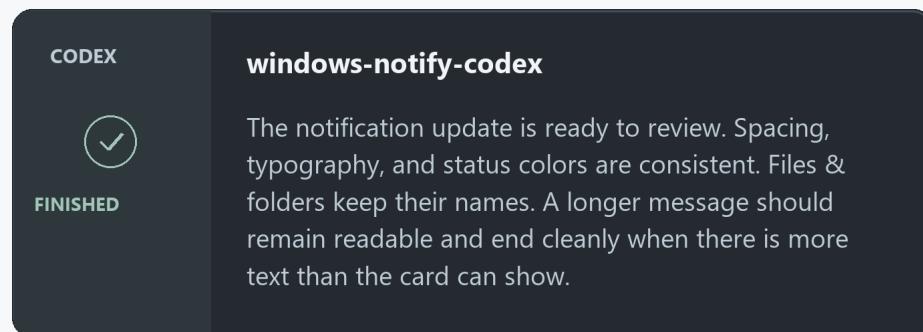

COMPLETION

ATTENTION

LONG MESSAGE / OVERFLOW

WHY CHOOSE IT

A small state column keeps the message area visually organized.

TRADEOFF

The state column takes space from the project and message.

 Surface

 Accent
#A3C5B9

34 Inset message

460 x 168 logical px / 12 px corner radius / inset layout

COMPLETION

● Codex task finished

windows-notify-codex: The update is ready to review. All checks passed.

LONG MESSAGE / OVERFLOW

● Codex task finished

windows-notify-codex: The notification update is ready to review. Spacing, typography, and status colors are consistent. Files & folders keep their names. A longer message should remain readable and end cleanly when there is more text than the card can show.

ATTENTION

● Codex needs attention

windows-notify-codex: Choose an option to continue. Your input is needed.

WHY CHOOSE IT

A pale inset groups the message while the status stays in the outer header.

TRADEOFF

The extra surface makes it a little less spare than the text-only options.

WHY CHOOSE IT

A single softly filled status circle creates a polished focal point.

TRADEOFF

The larger symbol makes this the most icon-led option.

WHY CHOOSE IT

Two short corner strokes give the card a recognizable signature without a full accent rail.

TRADEOFF

The corner treatment is decorative rather than functional.

 Surface

 Text
#323831

 Accent
#6A8265

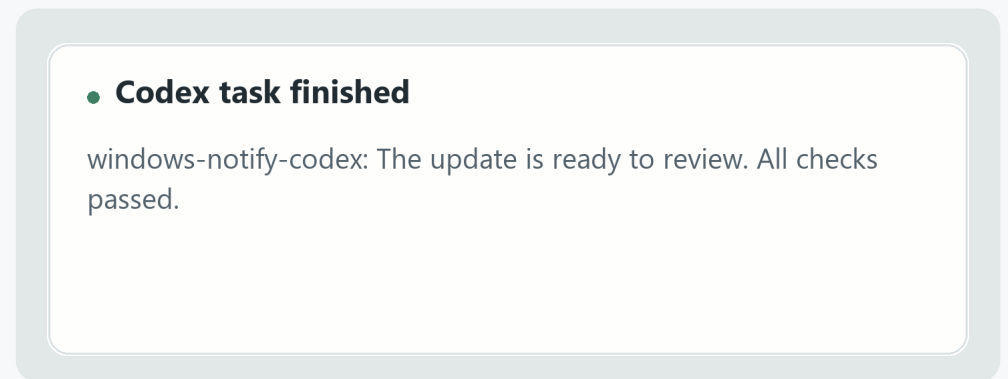

See the card against a desktop.

Simplified dark and light desktop backdrops reveal how much separation each treatment creates. These are illustrative backgrounds.

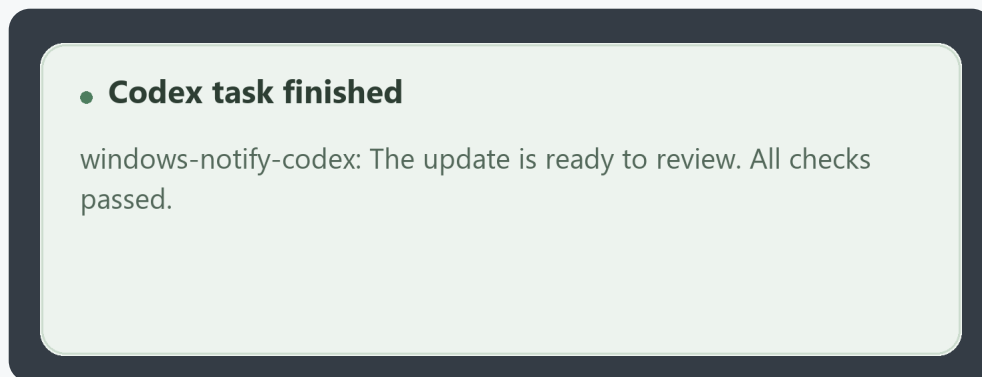

02 Graphite quiet

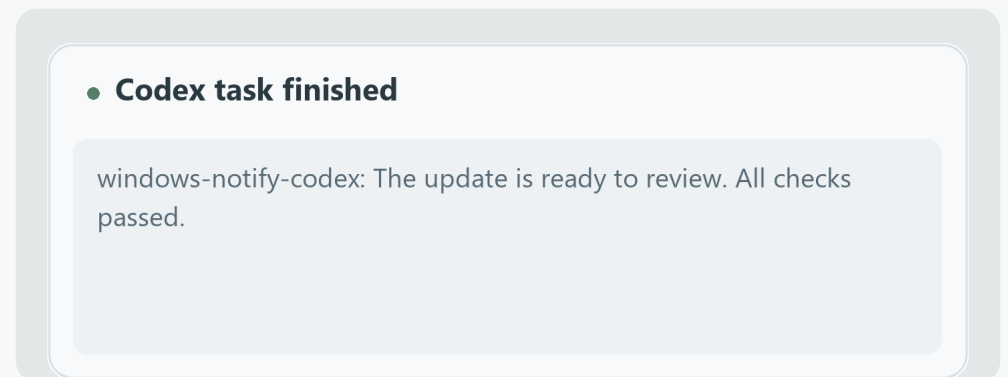

07 Porcelain

25 Sage wash

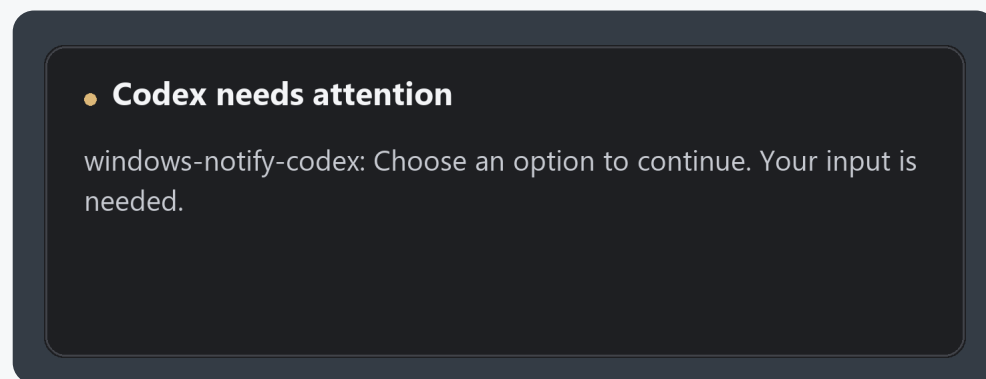

34 Inset message

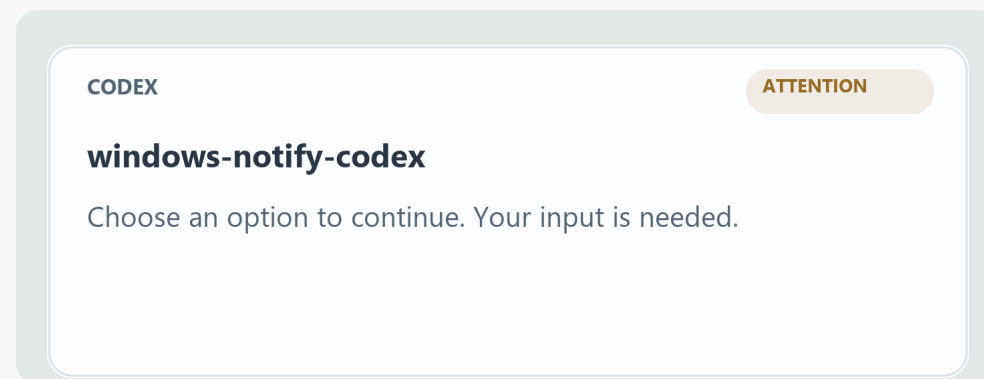

The same message, four directions.

Compare the attention state at an equal scale. The surface, layout, and labeling stay consistent with each concept.

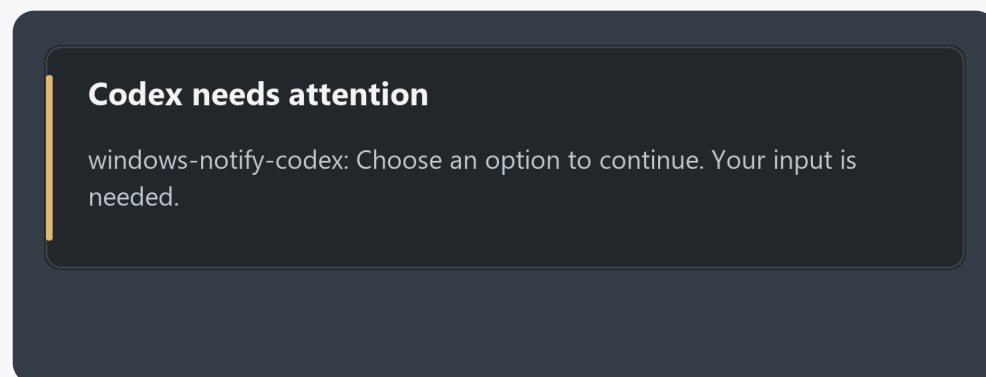

01 Refined baseline

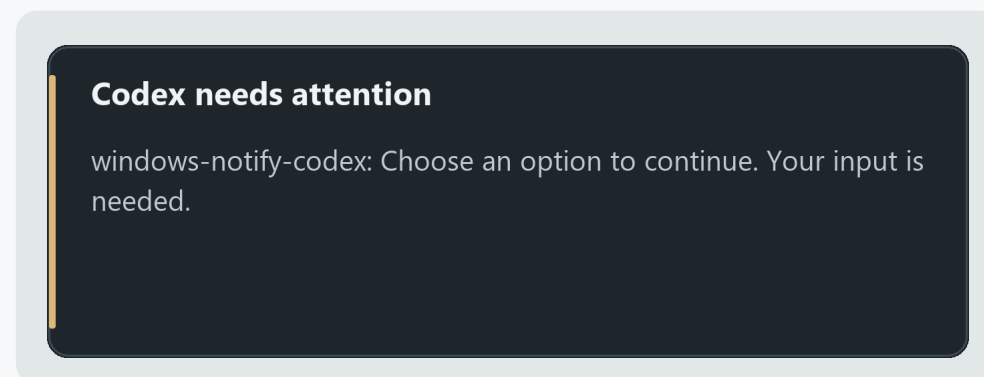

11 Pearl badge

13 Slim rail

31 Left rule

Six places to start.

These are subjective design picks, based on your request for something sleek, minimal, and slightly more polished.

- 01 Closest to what you have**
Keeps the familiar dark card and makes the smallest visual step.
- 02 Most restrained**
A plain text-led dark surface with very little visual decoration.
- 07 Cleanest light direction**
A neutral light card with a clear title and a tiny status marker.
- 13 Best starting point for compact**
A short card with a narrow accent and a readable hierarchy.
- 25 Gentlest color treatment**
A muted sage surface adds personality without saturation.
- 31 My first alternative to compare**
The full-height card gains one crisp accent without extra UI elements.

Your shortlist.

Choose one complete concept, or combine a small number of details. The concept number is enough to identify a starting point.
